---	---

WASTE WATER DRAINING OPERATION

Applicable to: ALL	<u>EASA OSD</u>
--------------------	-----------------

GENERAL

Normally the drain valve works automatically.

In case of overflow of the sink, the drain valve can be operated manually.

CAUTION	<p>The following items must not be poured into the sink as they could lead to a blockage of the water and waste system or contaminate the fuselage:</p> <ul style="list-style-type: none"> - Milk/Cream - Thick liquids (e.g. tomato juice, soup) - Dark liquids (e.g. coffee, tea, red wine) - Acidic liquids (e.g. orange juice, apple juice, vinegar) - Coffee grounds - Tea leaves - Food.
