

 A350 MANUEL SECURITE SAUVETAGE	<p align="center">PREFLIGHT CHECKLISTS</p> <p align="center">CABIN SYSTEMS</p> <p align="center">FAP CABIN SYSTEMS STATUS PREFLIGHT CHECK</p>
--	---

INTRODUCTION

Applicable to: ALL

This is done by navigating through the principle pages:

- Cabin Status page
- Doors/Slides page
- Waste Water page
- Lights page
- Temperature page
- Smoke page

Thus, they must check the status of the different cabin systems using the Forward Attendant Panel (FAP) and Mini-FAP.

If the FAP's and/or Mini-FAP screen are frozen, they must ask the flight crew to perform a CIDS reset as per FCOM procedure.
